Introduction

20xx JUNE AREA SURVEY

The June Area Survey is one of the largest annual NASS survey projects that provides significant utility for the entire NASS survey program.

OMB No. 0535-0213
Approval Expires: 5/31/2023
Project Code: 124
Survey ID: 2761

USDA/NASS - Texas
Southern Plains Region
PO Box 70
Austin, TX 78767-0070
Phone: 1-800-626-3142
Fax: 1-855-270-2725
Email: NASSRFOSPR@usda.gov

Please make corrections to name, address and ZIP Code, if necessary.

The information you provide will be used for statistical purposes only. Your responses will be kept confidential and any person who willfully discloses ANY identifiable information about you or your operation is subject to a jail term, a fine, or both. This survey is conducted in accordance with the Confidential Information Protection and Statistical Efficiency Act of 2018, Title III of Pub. L. No. 115-435, codified in 44 U.S.C. Ch. 35 and other applicable Federal laws. For more information on how we protect your information please visit: <https://www.nass.usda.gov/confidentiality>. Response is voluntary.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0535-0213. The time required to complete this information collection is estimated to average 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

National Agricultural Statistics Service

Introduction

- Benefits from the June Surveys:
 - Farm supply firms rely heavily on statistics
 - Reliable reports help serve farmer needs
 - Places farmers on equal footing

United States Department of Agriculture
National Agricultural Statistics Service

June Area Survey Impacts

1. Measures the incompleteness of the NASS List Sampling Frame (LSF).
2. Collects data on crop acreage, grain stocks, livestock inventory, ag labor, land values, farm type, value of sales, demographics, and computer usage.
3. Data reported by tract operators who are not overlapped (NOL) with the LSF form the basis of samples for follow-on surveys (Cattle Inventory, Sheep and Goat Report, Agricultural Labor, Hog Report, Agricultural Surveys, ARMS 3).

NASS maintains a list of farmers, partners, and other associated names with agricultural operations as part of the “List Sampling Frame”, (or LSF). We also call this the “List” for short.

The List Sampling Frame (LSF)

Attached to each record in the List is a set of “control data”, which indicate basic information about the operation, such as total cropland, crops recently produced, livestock inventory, approximate value of sales, etc.

Control Data Name	TypeId	Value	Unit
TOTAL LAND	100	1,183.0	ACRES
LAND RENTED FROM OTHERS	112	1,183.0	ACRES
CALCULATED FARM VALUE SALES	202	597,000	DOLLARS
CALCULATED TYPE OF FARM	203	3	LI - LIST INDIC
CENSUS TOTAL VALUE OF PRODUCTS S	213	1,399,330	DOLLARS
CENSUS TENURE CODE	214	2	LI - LIST INDIC
CENSUS SECONDARY SOURCE INDICATO	216	1	LI - LIST INDIC
CENSUS FARM TYPE	217	3	LI - LIST INDIC
CENSUS CURRENT_STATUS_CODE	218	61	LI - LIST INDIC

FARM WORKERS HIRED	885	1	NUMBER

The List Sampling Frame (LSF)

- Biggest strengths of a well-maintained List:
 - Data collection is relatively inexpensive.
 - Can target specific or rare commodities.
 - Stratified Random Sampling

The List Sampling Frame (LSF)

- Biggest challenges to the List are that:
 - Incomplete
 - Constantly changing
 - Requires ongoing maintenance
 - Expensive to maintain

Segments, Tracts and the Area Frame

The June Area Survey is different as we're sampling plots of land and analyzing the land use.

Break selected PSU down into sampling units

Counties

Select PSU's

United States Department of Agriculture
National Agricultural Statistics Service

Segments, Tracts and the Area Frame

Biggest Challenges to Area Frame Enumeration:

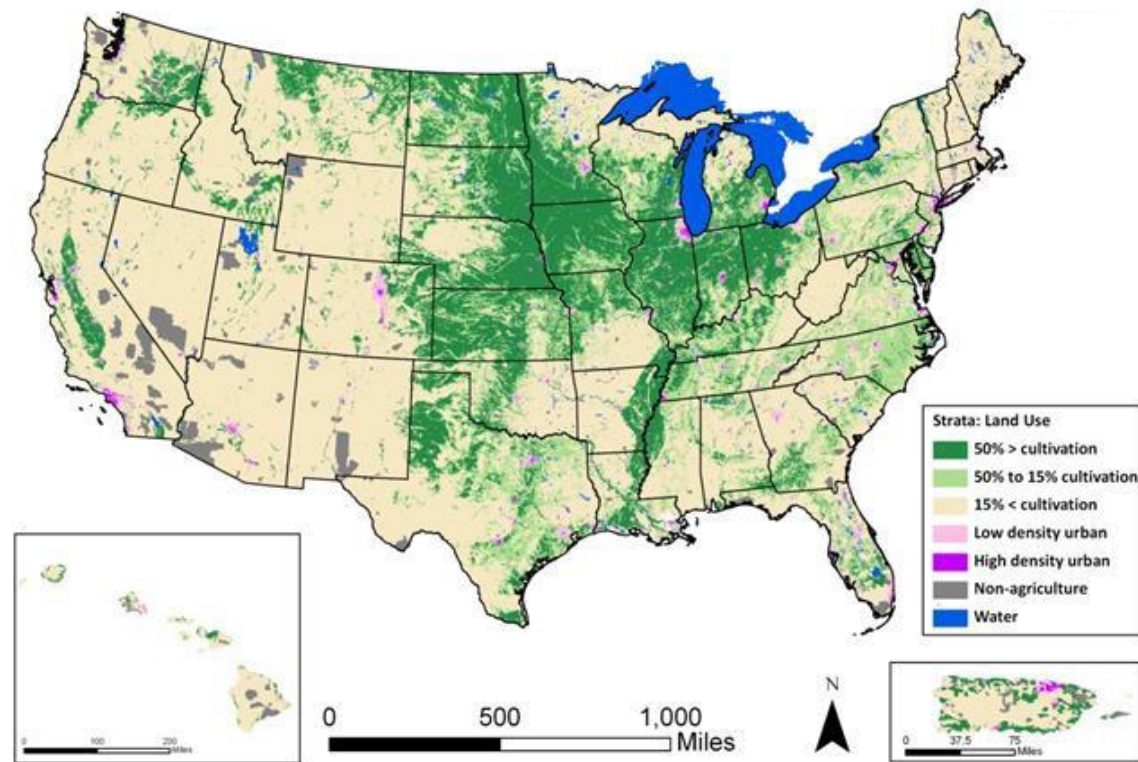

- Enumeration is very expensive
- Difficult to sample for specialty crops
- Lack of good boundaries

Segments, Tracts and the Area Frame

The June Area Survey is essentially a “scavenger hunt” in which we find all agricultural activity within each segment that meets the NASS definition of a farm.

National Agricultural Statistics Service
Land Use Area Frame

Segments, Tracts and the Area Frame

Each Segment will be marked by a 6-digit number, which will incorporate the year it rotated into the sample.

Craig, OK
191307
1 of 1

Alfalfa, OK
101067
1 of 1

Segments, Tracts and the Area Frame

A **Tract** is a parcel of land under one operating arrangement. Tract Boundaries are drawn in **BLUE** pencil (on aerial photo) and represented by **LETTERS**.

Segments, Tracts and the Area Frame

Non-Agricultural Tracts include areas of land with no agricultural activity. Non-Ag Tracts totaled 40,838 tracts nationwide (about 50%).

An **Agricultural Tract** is any operating arrangement with land in the segment boundary that has the potential to qualify as a farm.

United States Department of Agriculture
National Agricultural Statistics Service

Segments, Tracts and the Area Frame

PIGA Tracts are Public, Industrial or Grazing Association land which does not meet the definition of Land in Farms.

Found only in western states: AZ, CA, CO, ID, KS, MT, NE, NV, NM, ND, OK, OR, SD, TX, UT, WA, and WY

United States Department of Agriculture
National Agricultural Statistics Service

NASS's Farm Definition

“Any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year.”

United States Department of Agriculture
National Agricultural Statistics Service

June Area Takeaway

- Builds the important multi-framed estimates
- Creates supplemental samples for follow-on surveys
- Provides ground truth
- Provides snapshot of reality

Corn planted acreage up 2% from 2020
 Soybean acreage up 5% from last year

WASHINGTON, June 30, 2021 – The U.S. Department of Agriculture's National Agricultural Statistics Service (NASS) estimated 92.7 million acres of corn planted in the United States for 2021, up 2% from last year, according to the Acreage report released today. Soybean area planted is estimated at 87.6 million acres, up 5% from last year.

Following up to the Prospective Plantings report released in late spring, NASS surveyed more than 90,000 farm operators during the first two weeks of June to gather information on what farmers actually planted. Key findings released in the Acreage report include:

Introduction to Pre-Screening

Justin Cech
Northern Plains Region

United States Department of Agriculture
National Agricultural Statistics Service

Screening/Pre-Screening

Pre-Screening allows us to identify operators in a segment before June data collection starts.

United States Department of Agriculture
National Agricultural Statistics Service

Why Pre-Screen?

Identify segment boundaries, segment layout, non-agricultural areas within the segment, and the names and addresses of possible contacts.

United States Department of Agriculture
National Agricultural Statistics Service

Screening/Pre-Screening

- There must be a completed row on the screening form for each tract identified on the aerial photo.
- Even Segments that are entirely non-ag will still require at least one tract letter and one contact name.

Driving Around Segment

- Driving around a segment allows enumerators to acquaint themselves with the segment
 - Complete prior to phoning potential segment operators
 - Observe landmarks
 - Familiarize enumerator with segment
 - Observe/confirm non-ag
- Protecting enumerators and respondents is a primary concern

Enumerator Guidelines

- Plan routes efficiently
 - Use all available resources (Google Earth, paper maps, etc.) to ensure travels are completed with cost efficiencies in mind
- Limit exposure/contact with others
 - Do not get out of the car to talk to anyone
 - Do not visit any USDA Service Centers, County Assessor Offices, or any other offices or businesses for the purpose of identifying operators
- Utilize PPE
 - Wear a mask if stopping at a gas station or restaurant
 - Wash hands thoroughly or use hand sanitizer after visit and outside contact

Enumerator Guidelines

- Pull over to jot down notes
 - Note landmarks and road names that could help with identifying tracts operated over the phone
 - Document Non-Ag tracts with good descriptions
 - Take note of agricultural production (Ex. the wheat field, the corn stubble, etc.)
 - Note any landmarks within the tracts (Ex. Ditches, tree lines, waterways, etc.)
 - May need to note addresses on mailboxes or houses

What to bring when hitting the road

- **The manual tells you to bring...**
 - State Highway Map
 - County highway map showing segment locations
 - Area Screening Forms for one or more segments
 - Aerial photographs (with segment boundaries in red)
 - Extra blank screening forms
 - Clipboard (with a plastic cover)
 - Acreage grid
 - Special blue photo markers for marking photos
 - Your iPad

What to bring when hitting the road

- **Things to keep in the car**
 - NASDA Sign for your windshield
 - Boots/Raincoat
 - Extra pens and sharpened pencils
 - Pockets/Pocket Protector
 - Pencil Sharpener
 - Highway Map
 - Interviewer's Manual
 - NASDA Employee Handbook

What to bring when hitting the road

- **As you leave, have with you...**
 - Appropriate clothing for the weather
 - Food, snacks, and water
 - Money and/or credit card
 - Cell phone (if you have one)
 - Name Tag and NASDA ID
 - Time Sheets (proof for if you have an accident)

What to bring when hitting the road

- Plan your route before you leave your home, with alternatives
- Leave a note saying where you might be going (general location, not specific operations) and when you expect to return
- Keep track of your odometer reading for mileage

New Segments: Identifying the Operator, Assigning Tract Letters & Completing the Screening Form

[Click Here to return to List of Topics](#)

Wendy Vance
Northwest Region

United States Department of Agriculture
National Agricultural Statistics Service

New Segments

- First year in the sample
- Have not been enumerated before
- Drive to the segment
- Make notes of your observations
- Do not record any PII on aerial photos.

INTRODUCTION

[Introduce yourself and ask for the operator. Rephrase in your own words.]

I am working on the June Agricultural Survey. This is a national survey where agricultural producers are asked to provide information on crops and livestock.

The information you provide will be used for statistical purposes only. Your responses will be kept confidential and any person who willfully discloses ANY identifiable information about you or your operation is subject to a jail term, a fine, or both. This survey is conducted in accordance with the Confidential Information Protection and Statistical Efficiency Act of 2018, Title III of Pub. L. No. 115-435, codified in 44 U.S.C. Ch. 35 and other applicable Federal laws. For more information on how we protect your information please visit: <https://www.nass.usda.gov/confidentiality>. Response is voluntary.

The area of land shown on this photo (map) has been selected for this survey.

[Refer respondent to photo or map. Provide segment boundaries, houses and other identifying landmarks to help the respondent become familiar with the segment.]

1. On June 1, did you live or operate land inside these red lines?

Yes - [Continue with item 2.]

No - [Determine who the tract operators are inside the segment. Thank respondent and conclude interview.]

2. What were the boundaries of land operated inside these red lines?

[Verify or draw tract boundaries in blue, then continue with item 3.]

United States Department of Agriculture
National Agricultural Statistics Service

Getting the Correct Operator

- Operator:
 - The person responsible for all or most of the day-to-day decisions such as planting, harvesting, feeding, or marketing for the tract or total land operated. The operator could be the owner, hired manager, cash tenant, share tenant or a partnership. If land is rented or worked on shares, the tenant or renter is the operator.

Getting the Correct Operator

- Rental agreements:
 - Regardless of how rent is paid (free, cash, share of the crop), the person that is renting the land and deciding what is planted is the operator.

Getting the Correct Operator

- Common problems that have occurred:
 - Name recorded is a landlord
 - Name recorded is retired
 - Missing operation details such as operation name and partners

If we don't get the correct tract operator recorded in June, we're stuck with having the wrong name on the record for an entire year.

Getting the Correct Operator

- Take time to pre-screen thoroughly:
 - Verify the correct name spellings
 - Record a middle initial
 - Verify addresses and phone numbers
 - Obtain names of partners
 - A partnership is where two or more persons contribute some combination of land, labor, capital, equipment, materials, and management. Each person participates in day-to-day management decisions and shares in profits or losses, but not necessarily on an equal basis.

Getting the Correct Operator

- Sometimes we just don't know.
 - Not everyone can be contacted
 - Errors do happen
 - Operators can refuse or be inaccessible
 - Observations are necessary
 - Special and unique situations arise
 - Good judgement and common sense must be used
 - Do your best with the information you have and make notes

Assigning Tract Letters

- Once the operator has been identified for a piece of land in the segment:
 - (1) Draw the boundary of the land operated on the segment, on the aerial photo.
 - (2) Assign letters alphabetically, starting with 'A' as you identify operators.

Assigning Tract Letters

- Once the operator has been identified for a piece of land in the segment:
 - Record the tract letter, operator's name and contact information on the Screening Form.

5	6
TRACT LETTER	Line 1 – Full Name (First, Middle, Last) Line 2 – Mailing Address Line 3 – City, State, ZIP Code Line 4 – Telephone Number
A	Name: Joe Operator <hr/> Address: 111 – 111 th St <hr/> Anytown, XX 55555 <hr/> Phone: (555) 111-1111 <hr/>

Assigning Tract Letters

- Assign tract letters A, B, C, etc., in order, as you identify operators
- Do not skip any letters
- If all 26 letters are used, start using double letters: AA, BB, CC, etc.
- We cannot have more than 99 tracts in a single segments (Tract UUUU)

Assigning Tract Letters

- Tract letters that may be confused for others such as
 - N and Z
 - M and W
 - I and HShould be underlined

Half Acre Rule

- For residential areas, use the Half Acre Rule:

	Visible Ag Activity	No Visible Ag Activity
Half (½) Acre or Less	<ul style="list-style-type: none">• Assign tract letter• Complete tract questionnaire	<ul style="list-style-type: none">• Assume non-ag tract
More than Half (1/2) Acre	<ul style="list-style-type: none">• Assign tract letter• Complete tract questionnaire	<ul style="list-style-type: none">• Interview operator and complete Screening Form

Completing the Screening Form

- Column 20 – Does this tract have potential for agriculture?
- Consider:
 - Ask respondent if they **intend** to have agriculture in the next year. **If** no respondent is available, use your best judgment.
 - Could a crop be seeded without having to improve or clear the land?
 - Is there a greenhouse or grain storage bin on the property?
 - Is there a fenced pasture, barn, pen, hog building, chicken house, or any other sign of potential for livestock?
 - Non-Ag Tracts coded to have a potential for agriculture **MOST LIKELY** will be sampled for all follow-on surveys such as the Ag Survey, Cattle, Sheep, Hogs, and Labor

L TRACTS	
What best describes this non-agricultural tract?	
Enter code	
783	

Codes to be used in Column 20a are:
(1) Residential
(2) Woods
(3) Idle Open Land
(4) Pasture
(5) Water
(6) Reported Non-Ag by Respondent
(7) Vacant Houses
(8) Obvious Non-Ag
(9) Grassland
(10) Hunting Preserve or Private Land Managed for Wildlife
(11) Government Land
(12) Other

Completing the Screening Form

[Complete these items when enumeration of segment is completed.]

1. Total tract letters listed in **Column 5, page 2** (sum of all Screening Forms for this segment).....

2. Number of **tract letters** listed **on photo** or map.....

(Item 1 must equal item 2.)

3. Number of **Area Version** questionnaires completed.....

4. Number of tracts with acreage listed in **Column 18, page 3**..... +

5. Number of tracts with acreage listed in **Column 21, page 3**..... +

6. Total of items 3 + 4 + 5..... =

(Item 6 must equal items 1 and 2.)

Completing the Screening Form

- Special Situations

- Federal Public Land (Forest Service)
- Non-Federal Public Land
- Industrial Land
- Grazing Associations
- Institutional Farms
- Ag Businesses
- Out-of-state operations
- Boundaries of segment not identifiable.
- Boundaries of segment on aerial photo and county map do not agree.
- Segment boundaries extend into a neighboring state/county
- Segment boundary cuts through a field.

If you have questions, review the Interviewer's Manual
or reach out to your supervisor.

Thank you for all that you do!

Review the Aerial Photo

BEFORE SHIPPING YOUR PHOTOS BACK:

- Look for blank unlabeled areas on photo
- Check the Photo Against the Screening Form AND what is in CAPI
 - Find each tract letter
 - Check that ambiguous tract letters are underlined
N, Z, M, W, I, H.
 - Compare total tract sizes

The Aerial Photos 5 C's

1. **Complete:** All Land is accounted for
2. **Clear:**
 - ✓ No erroneous information
 - ✓ Letters are in one direction with North facing up
3. **Correspond:**
 - ✓ Tract letters match the screening form
 - ✓ Tract letters match what is in CAPI
4. **Correct:**
 - ✓ Lines are in correct location
 - ✓ Correct colors – Segments are red, Tracts are blue.
5. **Confidential:**
 - ✓ Absolutely no names should ever be written on the aerial photo

It should NOT look like this:

United States Department of Agriculture
National Agricultural Statistics Service

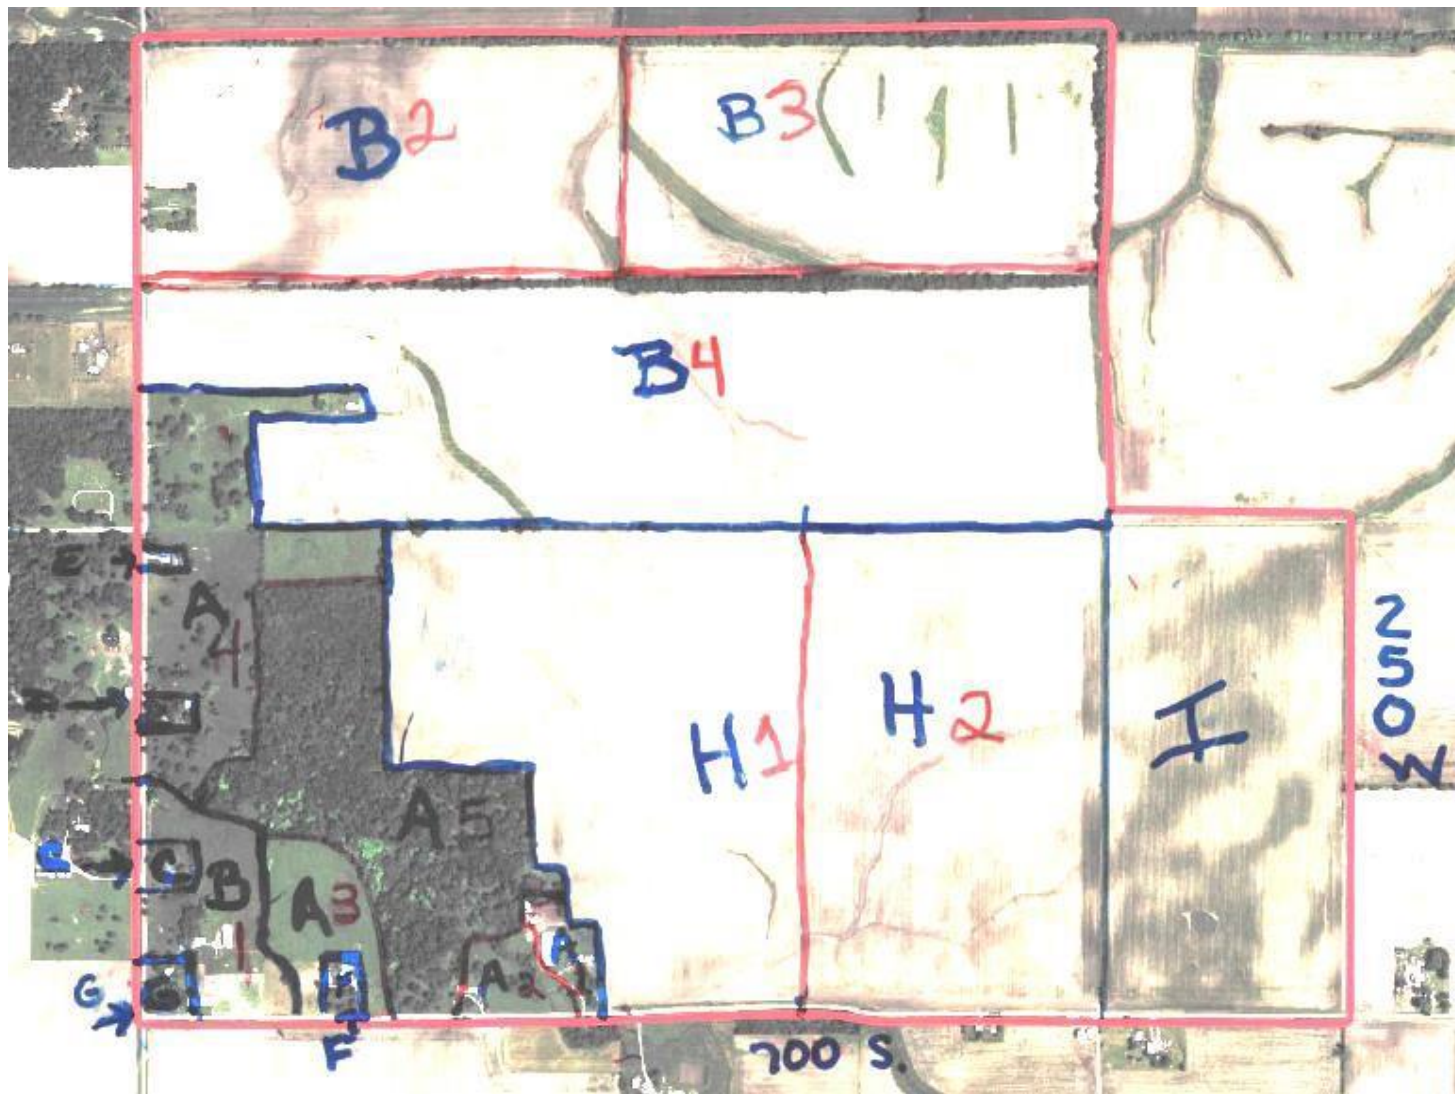

This is CORRECT:

United States Department of Agriculture
National Agricultural Statistics Service

This COULD be Better:

United States Department of Agriculture
National Agricultural Statistics Service

This is CORRECT:

United States Department of Agriculture
National Agricultural Statistics Service

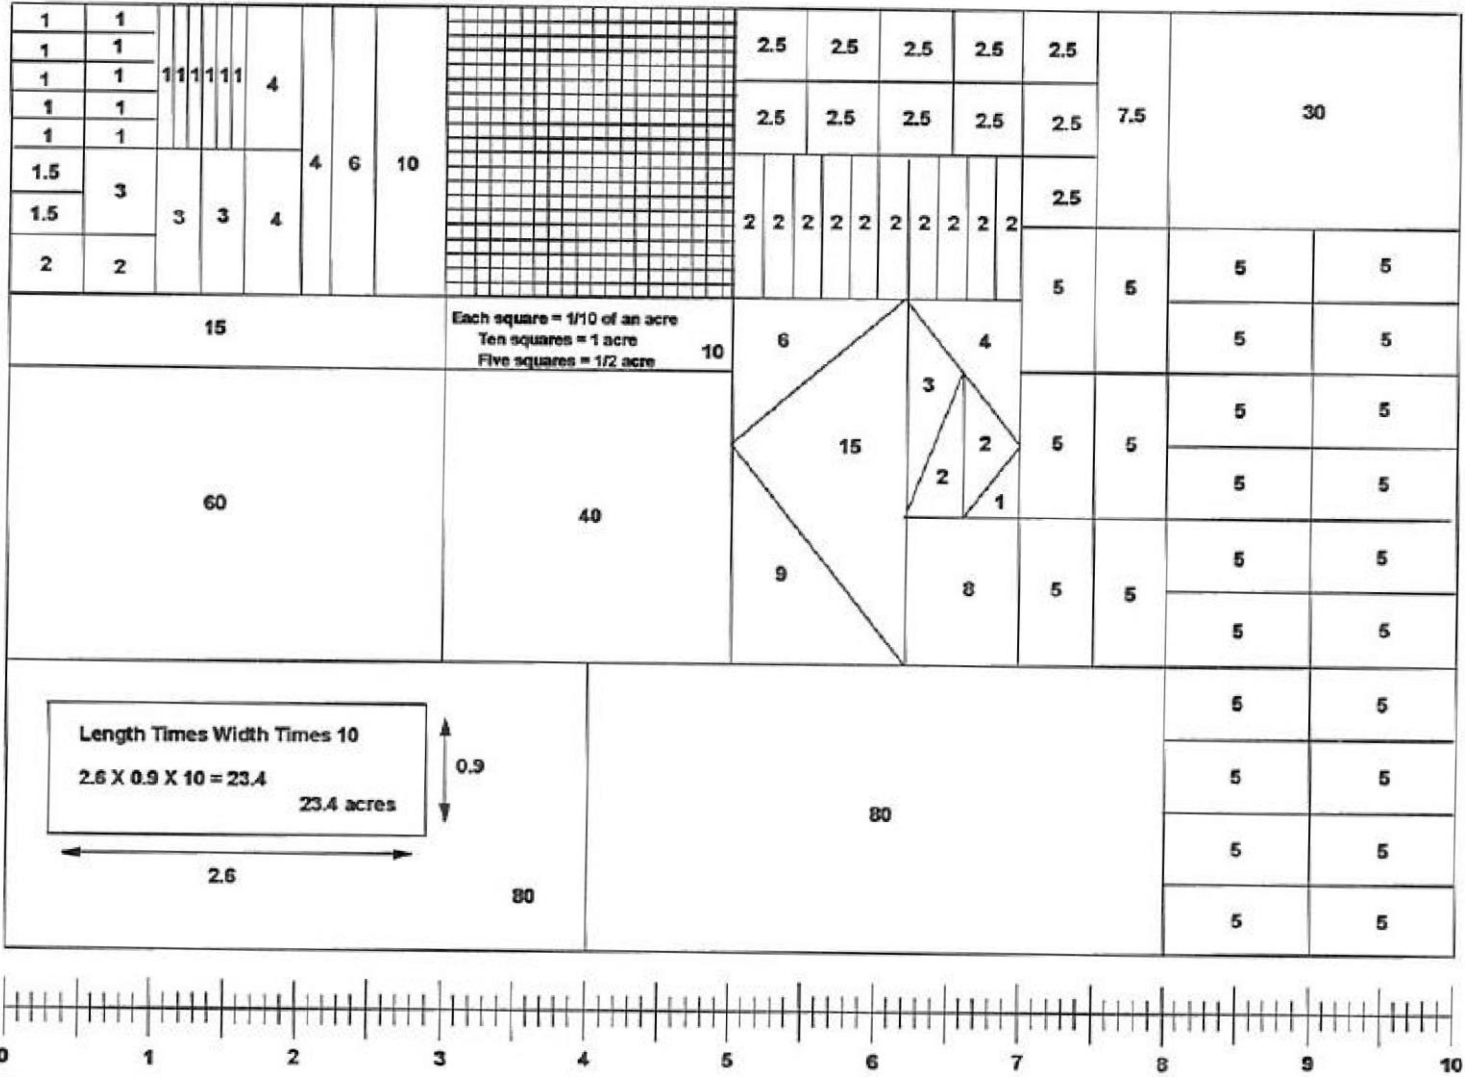

Acreage Grid

- When to use it
 - If acreage is unknown
 - Refusals and Inaccessibles
 - Non-Ag Tracts
 - Woods and Waste
 - To verify land totals
 - Digitized acres
 - Field Acres to sum of Tract Acres
 - Tract Acres to sum of Segment Acres

Acreage Grid

Acreage Grid

- How to use it
 - Template method
 - Place grid over the area
 - Acres = sum of the covered squares
 - Ruler method
 - Measure the length and width
 - Acres = Length X Width X 10
 - Triangles with a right angle
 - Acres = $\frac{1}{2}$ (horizontal base X vertical height X 10)

Template Method

Place the acreage grid on top of the aerial photo

Try to find a shape that matches the field

United States Department of Agriculture
National Agricultural Statistics Service

Template Method

The square with 40 in it matches

So that means there are 40 acres in that field

Template Method

You may not find an exact square to match the field, but you can still use the template method

United States Department of Agriculture
National Agricultural Statistics Service

Template Method

Place these 5 acre boxes over the field

Add them up to find that there are 20 acres in this field

Template Method

Use the 1/10 of an acre boxes for small odd shaped fields

Count the number of squares

200 squares = 20 acres

United States Department of Agriculture
National Agricultural Statistics Service

Ruler Method

The ruler method works better for large rectangular fields

United States Department of Agriculture
National Agricultural Statistics Service

Ruler Method

Use the ruler on the bottom of the grid to see the width of the field is 1.5 inches

United States Department of Agriculture
National Agricultural Statistics Service

Ruler Method

Move the ruler vertically to see that the length of the field is 5.5 inches

United States Department of Agriculture
National Agricultural Statistics Service

Ruler Method

Multiply the length times width times 10 to find 82.5 acres in field

United States Department of Agriculture
National Agricultural Statistics Service
