

DO YOU PRODUCE FOOD OR BEVERAGE PRODUCTS?

Join our community of entrepreneurs and businesses who want to learn more about what it takes to make great products!

The Food Entrepreneurship and Manufacturing Institute (FEMI) is housed within the Food Science Department at Purdue University. FEMI works with clients producing products across the food and beverage industry, from entrepreneurial to global scales. Based on client need, FEMI has created online courses that serve as a guide for entrepreneurs and businesses into essential food and beverage industry and business planning information. If you want to learn more about how to take your product to market and the business knowledge to make it feasible and sustainable, these are the courses for you!

Course Information:

What: Food Science and Business Planning content

Where: Registration is located through the Purdue Online website

When: Registration opens in May 2024 and will remain open indefinitely

How: Coursework is completely asynchronous so you can learn at your own pace and time.

Who: Producers of food and beverage products seeking fundamental food safety and processing and business planning information.

Registration opens in May 2024! Please visit our website for more information at:
<https://ag.purdue.edu/department/foodsci/femi/index.html>

Important Special Offering!

Do you produce your own agricultural commodity and to make your food or beverage product? If so, read the right side panel for information on how to receive fee-waived registration for FEMI online courses.

Agricultural Innovation Center (AIC) Grant Opportunity:

FEMI has received a grant from the USDA called the Agriculture Innovation Center (AIC) to help agricultural producers create value-added products from their agricultural commodities. As a recipient of this grant, FEMI is offering eligible participants fee-waived access to the online courses.

If eligible for the AIC grant, you will receive a promo code to register for the online coursework!
